

## ASX Announcement

19 January 2023

# Optus signs additional 1-year contract extension for enterprise Knowledge Management solution

**Knosys Limited (ASX: KNO)**, a global software-as-a-service (SaaS) information technology company, is pleased to announce that Optus has signed an additional one (1) year contract extension for the continued use of Knosys' market leading knowledge management platform, KnowledgeIQ. The value of this contract extension is expected to exceed \$1 million.

Optus continues to demonstrate its commitment to the KnowledgeIQ solution. In April 2022, Optus finalised a contract extension for two years to January 2024 and this latest contract extends the engagement for another year to January 2025.

Knosys Managing Director, John Thompson, said "This further contract extension allows us to continue our partnership with Optus and further develop the knowledge management solution to meet their future business needs. Our development focus over the next 2 to 3 years will be on furthering the capability of KnowledgeIQ to improve employee productivity and on further enhancements to its usage in customer facing activities."

"Over the past six months, we have secured contract extensions from our major KnowledgeIQ customer base, including ANZ Bank, Singtel and Optus. This provides visibility on our recurring revenue base over the years ahead and enables us to make strategic investment decisions on the further development of this solution.

Knosys enters 2023 with a diversified customer base, a portfolio of software solutions, strong recurring revenues, and the opportunity to continue growing domestically and internationally."

## ABOUT KNOSYS

Knosys is a leading SaaS provider based in Melbourne, with specialist expertise in helping businesses manage information and knowledge. We enable organisations to make sense of information and use it to connect, collaborate and drive strong business outcomes for customers, employees and stakeholders. Our focus is on developing solutions that enable businesses to make the most of information and knowledge assets that sit within their organization. This currently includes knowledge management, intranet and library management solutions.
